SUMMARY

Computer Science graduate with hands-on experience building REST APIs and full-stack web applications using Java, Spring Boot, and React. Built and deployed 4 independent projects spanning backend architecture, relational database design, and responsive front-end UI. Strong fundamentals in OOP, SQL, and data structures; quick to pick up new frameworks and comfortable working across the stack.

TECHNICAL SKILLS

Languages: Java (OOP, Collections, Strings, JDBC), SQL

Databases: MySQL (Joins, Subqueries, Aggregations, Indexing)

Web Technologies: HTML5, CSS3, JavaScript, React, Bootstrap

Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate

Tools: Git, GitHub, Postman, Swagger, Maven, VS Code, Eclipse

Core Concepts: OOP, RESTful API Design, Layered Architecture, Exception Handling

PROJECTS

Student Management System — Full-Stack Developer

- Built a full-stack student management application with a Spring Boot REST API backend and a JavaScript frontend supporting add, view, edit, delete, and search operations.
- Designed and tested 10+ RESTful API endpoints using Spring Boot and Spring Data JPA, documented with Swagger and validated in Postman.
- Modeled a normalized MySQL schema with input validation and centralized exception handling. Deployed backend on Railway and frontend on Netlify.
- Tech Stack: Java, Spring Boot, MySQL, Maven, Spring Data JPA, Swagger, Postman, JavaScript.

Tech Shop — React Web Application — Frontend Developer

- Developed a fully responsive e-commerce style product website using React.js, structured into 10+ reusable components for maintainability.
- Implemented a component-driven UI layout with clean state management and mobile-first responsive styling.
- Tech Stack: React.js, JavaScript, Tailwind CSS, Vite.

[Live Demo](#) | [Repo](#)

Personal Portfolio Website — Developer

- Designed and built a personal portfolio site to showcase projects, skills, and achievements with a clean, responsive layout.
- Deployed live via GitHub Pages. Tech Stack: HTML, CSS, JavaScript.

[Live Site](#) | [Repo](#)

Library Management System — Core Java Project

- Built a console-based Library Management System applying core OOP principles (inheritance, encapsulation, polymorphism) across a multi-class architecture.
- Implemented book issue/return tracking and search logic. Tech Stack: Core Java, OOP, Eclipse IDE.

EDUCATION

B.Tech, Computer Science & Engineering — Biju Patnaik University of Technology | CGPA: 7.6 | 2021 – 2025

Intermediate (Science) — IGM Higher Secondary School of Science & Technology | 68% | 2019 – 2021

Matriculation — Gopinath Jew High School | 66.33% | 2019

CERTIFICATIONS & ADDITIONAL INFO

- Core Java Programming — Achievers IT: covered OOP, Collections, and foundational real-world application development.
- Active on HackerRank and LeetCode, regularly solving data structures and algorithms problems to strengthen coding proficiency.
